MANUFACTURING ENVIRONMENTALLY FRIENDLY HOME

1 PATENTED TECHNOLOGY-PURE ALDEHYDE ANTIBACTERIAL PAPER

Nano silicon titanium self-cleaning agent coating can adsorb and decompose free formaldehyde in the air. At the same time, the surface has antibacterial function and has won the national invention patent.

2 NANO SILICON TITANIUM SELF-CLEANING AGENT

The unique "molecular sieve" structure of nano porous materials, with a porosity of more than 90%, is regularly and neatly arranged in circular and needle shapes. The molecular lattice structure determines the unique physical adsorption and ion exchange, and the adsorption force is very strong. Continuously produce a large number of "hole electrons". It forms active oxygen for O₂ and H₂O and completely decomposes free formaldehyde into water and carbon dioxide, which is safe and pollution-free. Simultaneous use Nano silver ions destroy the cell membrane, leak the cell content, and completely eliminate Escherichia coli and staphylococcus aureus harmful bacteria, safe and harmless to human body.

3 NATURAL DECOMPOSITION AND NATURAL HEALTH

The main components of nano silicon platform self-cleaning agent are natural mineral extracts, which do not produce any harmful substances and pollution in the process of adsorption and decomposition of formaldehyde.

4 BACTERIOSTATIC NET ALDEHYDE DOUBLE PROTECTION

Was 99.99%. It not only adsorbs and decomposes free formaldehyde, but also effectively eliminates harmful bacteria such as Escherichia coli and Staphylococcus aureus. It has been tested by authoritative institutions, the purification rate of formaldehyde was 79.9%, and the antibacterial rate was 99.99%.

5 63.7% LONG ACTING NET ALDEHYDE

Evenly distribute, through capture, adsorption decomposition and continuous and effective play to the antibacterial function of net aldehyde. According to the test of authoritative institutions, the durability of formaldehyde purification effect is 63.7%. The purification rate of formaldehyde was 79.9%, and the antibacterial rate was 99.99%.
